Risk Acknowledgement

I/We recognize that agricultural investments are influenced by natural and market conditions, and as such, returns may vary based on factors including plantation yield and prevailing market prices of Fresh Fruit Bunches (FFB). While these variables exist, OMP Global Investment LTD adopts a structured, professionally managed approach to farming operations-leveraging industry expertise, best agronomic practices, and efficient management systems-to consistently drive optimal performance and long-term value.

We understand that agriculture, by nature, may be impacted by external elements such as weather patterns, pests, diseases, and market fluctuations. However, proactive risk management and operational discipline are applied to mitigate these factors as much as possible.

It is therefore acknowledged that while OMP Global Investment LTD is committed to delivering strong performance, returns or profits cannot be guaranteed, and this investment does not operate on a profit-sharing arrangement.
